

**Laurel Rod & Gun Club
Comment on SB-250
Senate Fish & Game Committee**

Laurel Rod & Gun Club would like to go on record as Opposing this piece of Legislation.

- **The priority of lands under ownership of MTFWP is the enhancement of fish and wildlife resources, maintenance is very important, however not the main priority.**
- **As far as noxious weed control FWP does a pretty good job of containing, controlling or eradication. In many instances much better than the private lands that touch the borders FWP lands.**
- **This piece of Legislation is yet another means of removing the authority of our public trustee of our publicly owned resources.**
- **Although LRGC is a huge proponent of private property rights we are also huge proponents of public property rights, this bill ignores those public property rights and gives all power to private entity (s).**

In closing LRGC wants to reiterate our Opposition to this bill.
